

Peak Pressure Indicator MSI-3

High accuracy in all speed ranges!

The MSI-3 peak pressure engine indicator is designed for displaying the maximum value of gas pressures which are subject to rapid variations.

Features:

- Measuring range up to 300 bar
- Easy handling
- High accuracy in all speed ranges
- Extremely robust, low maintenance
- Insensitive to vibration
- Pressure gauge in safety construction
- Light-weight

Standard accessories:

- 1 wooden box
- 1 hollow spanner - connecting nut
- 1 test protocol
- 1 operating instructions

Every single device is being tested and calibrated according to our ISO 9001 quality standards and will be supplied with a calibration certificate proving the accuracy of the device.

Technical specifications:

Measuring ranges	0 to 160 bar, 0 to 250 bar, 0 to 300 bar
Engine range	up to 2.500 rpm
Permissible temperature	ambient -20 to 60°C
Error margin	± 1.6 %
Dimensions	210 mm x 155 mm x 60 mm
Weight	3.0 kg with wooden box
